Full-Stack Software Engineer | TypeScript, React, Node.js & Spring Boot | U.S. Navy Veteran

Full-stack software engineer with hands-on experience building web applications using TypeScript, React, Node.js, Express, Java, Spring Boot, REST APIs, SQL, MongoDB, Docker, and Git. Experienced with authentication, authorization, database design, testing, documentation, and deployment-ready application architecture. Brings enterprise IT and military leadership experience supporting technical workflows, stakeholder communication, UAT, reporting, and mission-critical operations.

SKILLS

Languages: TypeScript, JavaScript, Java, SQL, Python

Frontend: React, TypeScript, React Router, React Query, Axios, HTML, CSS, Tailwind CSS

Backend: Node.js, Express, Spring Boot, Spring Security, Spring Data JPA, REST APIs, JWT, Authentication

Databases: MongoDB, Mongoose, PostgreSQL, MySQL

Tools & Platforms: Docker, Git, GitHub, Swagger/OpenAPI, Postman, Linux, AWS, Vercel, JUnit, Mockito, Testcontainers, MockMvc

PROJECTS

ClientHub | Full-Stack CRM Application

Live Demo: clienthub-frontend-sigma.vercel.app

GitHub (Backend): github.com/mdubelbeis/clienthub-api

GitHub (Frontend): github.com/mdubelbeis/clienthub-frontend

Java, Spring Boot, Spring Security, React, TypeScript, PostgreSQL, Docker, JUnit, Swagger/OpenAPI

- Built a full-stack client management application using Java, Spring Boot, React, TypeScript, PostgreSQL, and Docker, supporting authenticated user, client, and activity workflows.
- Designed REST APIs with JWT authentication, user-scoped authorization, request validation, DTO-based contracts, centralized exception handling, and Swagger/OpenAPI documentation.
- Built responsive React views with protected routes, reusable components, authenticated API calls, and dashboard/client management workflows.
- Modeled relational data and layered backend services using controller-service-repository architecture to enforce per-user ownership rules and maintain clean business logic.
- Wrote automated tests with JUnit and configured environment-based settings, CORS behavior, Docker support, and deployment-ready documentation.

Bug-Board | Full-Stack Issue Tracking Application | In Development

GitHub: github.com/mdubelbeis/bug-board

React, TypeScript, Node.js, Express, MongoDB, Mongoose, JWT, REST APIs

- Building a full-stack issue tracking application using React, TypeScript, Node.js, Express, MongoDB, and Mongoose, to focus on production-style full-stack development.
- Designing REST API endpoints for authenticated user, project, and issue management workflows, with planned support for JWT authentication, protected routes, request validation, and centralized error handling.
- Modeling MongoDB data with Mongoose schemas for users, projects, and issues, focusing on data relationships and maintainable backend structure.
- Developing responsive React views with reusable components, client-side routing, authenticated API calls, and dashboard workflows for managing projects, issues, statuses, and priorities.

Order Management API | Backend API

GitHub: github.com/mdubelbeis/order-management-api

Java, Spring Boot, PostgreSQL, JUnit, Testcontainers, MockMvc, Mockito

- Built a production-style backend API for managing users, products, orders, and inventory using Spring Boot, PostgreSQL, and layered service architecture.
- Implemented transactional business workflows for checkout, inventory validation, and order state transitions using DTO-based contracts and centralized exception handling.

Dubex | TypeScript Developer CLI Tool | In Development

GitHub: github.com/mdubelbeis/dubex

Node.js, TypeScript, CLI, File System, Developer Tooling

- Developing a TypeScript-based CLI tool focused on developer productivity, code generation, and repeatable workflow automation.
- Implementing command-line workflows for parsing source files, generating class accessors, and writing formatted output back to JavaScript and TypeScript files.
- Using Node.js file system utilities, modular command structure, and typed helper functions to separate parsing, formatting, and file update logic.

WORK EXPERIENCE

IT Specialist

Department of Labor | Washington, DC | 07/2023 - 09/2025

- Supported enterprise IT and project management workflows across ServiceNow, Jira, SharePoint, Power BI, Excel, and MS Project in a federal technology environment.
- Performed UAT, data validation, and cross-environment issue analysis to verify system and reporting changes met business requirements before release.
- Produced functional documentation, process guides, reporting materials, and workflow artifacts that improved consistency and reduced submission errors by 30%.
- Collaborated with technical and business stakeholders to investigate issues, validate fixes, clarify requirements, and communicate delivery risks.

First-Line Supervisor

United States Navy | Norfolk, VA | 10/2018 - 09/2022

- Coordinated workload and administrative processes for 95 personnel, supporting transfers, leave, telework, and operational continuity.
- Revised inventory tracking and accountability processes, maintaining full operations while improving records accuracy and financial oversight.
- Supervised, trained, and mentored team members in a mission-critical environment requiring clear communication, accountability, and procedural compliance.
- Developed tracking, reporting, and training processes that improved accountability, planning, and operational handoff consistency.

Air Traffic Control Tower Chief

United States Navy | Lakehurst, NJ | 09/2014 - 10/2018

- Directed daily tower operations for a 23-person team supporting 13,000+ mishap-free flight operations through disciplined coordination and procedural compliance.
- Generated facility directives and rewrote operating procedures to improve safety, efficiency, compliance, and standardization.
- Led training and qualification efforts for operational personnel, strengthening readiness, documentation quality, and team execution.

Sales Associate

Melissa Rodriguez - State Farm | Georgetown, TX | 07/2025 - 03/2026

- Managed lead follow-up, quoting, and CRM documentation across 102 issued policies totaling \$87,369 in written premium.
- Maintained high-volume customer communication and documentation workflows, strengthening client service, follow-up discipline, and sales process execution.

EDUCATION

Bachelor of Science, Software Engineering

Western Governors University | Graduated May 2026

Associate of Science: Aeronautics

Embry-Riddle Aeronautical University | Graduated January 2017

CERTIFICATIONS

AWS Cloud Practitioner | Linux Essentials | CompTIA A+ | CompTIA Project+ | ITIL 4 Foundation
