Full-Stack Software Engineer | Java, Spring Boot & React | U.S. Navy Veteran

Full-stack software engineer building secure web applications with Java, Spring Boot, React, TypeScript, SQL, and Docker. Experienced in REST API development, relational database design, authentication, authorization, automated testing, and deployment-ready application architecture. Brings leadership, documentation, troubleshooting, and enterprise experience from federal IT and military operations. Seeking a full-stack or backend-focused software engineering role building reliable, scalable business applications.

SKILLS

Languages: Java, TypeScript, JavaScript, SQL, Python

Backend: Spring Boot, Spring Security, Spring Data JPA, JPA/Hibernate, REST APIs, JWT

Frontend: React, TypeScript, React Router, React Query, Axios, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL

Testing: JUnit, Mockito, Testcontainers

Tools & Platforms: Docker, Git, GitHub, Swagger/OpenAPI, Postman, Linux, AWS

PROJECTS

ClientHub | Full-Stack Application

Live Demo: clienthub-frontend-sigma.vercel.app

GitHub (Backend): github.com/mdubelbeis/clienthub-api

GitHub (Frontend): github.com/mdubelbeis/clienthub-frontend

Java, Spring Boot, Spring Security, React, TypeScript, PostgreSQL, Docker, JUnit, Swagger/OpenAPI

- Built a secure full-stack client management application using Java, Spring Boot, React, TypeScript, PostgreSQL, and Docker, supporting authenticated client and activity workflows.
- Designed REST APIs with JWT authentication, authorization controls, request validation, centralized exception handling, and user-scoped data access.
- Implemented protected frontend routes, reusable UI components, typed API calls, and authenticated client-side workflows for dashboard and client management features.
- Modeled relational data and layered backend services to enforce per-user ownership rules and support maintainable application architecture.
- Wrote automated tests with JUnit and containerized the application with Docker to support consistent, deployment-ready development workflows.

Order Management API

GitHub: github.com/mdubelbeis/order-management-api

Java, Spring Boot, PostgreSQL, JUnit, Testcontainers, MockMvc, Mockito

- Built a production-style backend API for managing users, products, orders, and inventory using Spring Boot, PostgreSQL, and layered service architecture.
- Implemented transactional business workflows for checkout, inventory validation, and order state transitions using DTO-based contracts and centralized exception handling.
- Developed integration and controller slice tests using JUnit, Testcontainers, MockMvc, and Mockito to validate PostgreSQL persistence behavior, API responses, inventory edge cases, and failure-path handling.

Vacation Booking API

GitHub: github.com/mdubelbeis/vacation-booking-api

Java, Spring Boot, JPA/Hibernate, MySQL

- Built a backend REST API for travel booking workflows supporting customers, carts, vacations, excursions, and transactional checkout processing.
- Applied layered Spring Boot architecture, JPA-based relational modeling, and DTO/service-driven design to organize business logic and persistence cleanly.
- Implemented transactional checkout workflows that validated purchase payloads, persisted related booking records, generated tracking numbers, and maintained data integrity through rollback protection.

WORK EXPERIENCE

IT Specialist

Department of Labor | Washington, DC | 07/2023 - 09/2025

- Analyzed business requirements, system workflows, and reporting needs across enterprise platforms, supporting enhancements to ServiceNow modules and PMO reporting processes tied to 60+ projects.
- Produced functional and technical specifications for workflow and reporting changes, helping drive process improvements that reduced submission errors by 30%.
- Performed UAT, data validation, and cross-environment issue analysis to verify system changes met business and operational requirements before release.
- Collaborated with stakeholders across technical and business teams to investigate issues, validate fixes, and identify delivery risks within 48 hours.

First-Line Supervisor

United States Navy | Norfolk, VA | 10/2018 - 09/2022

- Coordinated workload and administrative processes for 95 personnel, supporting transfers, leave, telework, and operational continuity.
- Revised inventory tracking and accountability processes, maintaining full operations while improving records accuracy and financial oversight.
- Supervised, trained, and mentored team members in a mission-critical environment requiring clear communication, accountability, and procedural compliance.
- Developed tracking, reporting, and training processes that improved accountability, planning, and operational handoff consistency.

Air Traffic Control Tower Chief

United States Navy | Lakehurst, NJ | 09/2014 - 10/2018

- Directed daily tower operations for a 23-person team supporting 13,000+ mishap-free flight operations through disciplined coordination and procedural compliance.
- Generated facility directives and rewrote operating procedures to improve safety, efficiency, compliance, and standardization.
- Led training and qualification efforts for operational personnel, strengthening readiness, documentation quality, and team execution.

Sales Associate

Melissa Rodriguez - State Farm | Georgetown, TX | 07/2025 - 03/2026

- Managed lead follow-up, quoting, and CRM documentation across 102 issued policies totaling \$87,369 in written premium.
- Maintained high-volume customer communication and documentation workflows, strengthening client service, follow-up discipline, and sales process execution.

EDUCATION

Bachelor of Science, Software Engineering

Western Governors University | Remote | Graduated May 2026

Associate of Science: Aeronautics

Embry-Riddle Aeronautical University | Remote | Graduated January 2017

CERTIFICATIONS

AWS Cloud Practitioner | 02/2026

Linux Essentials | 08/2024

CompTIA A+ | 07/2024

CompTIA Project+ | 10/2024

ITIL 4 Foundation | 10/2024
